WE DON'T HAVE FAMINES
Every now and then news items appear to the effect that meat production is declining. And this, in turn, is picked up by extremists who dolefully predict meat "famines" by a given date. As an example, some of the Washington crepe-hangers seemed sure that such a famine would appear by last May Day.

May Day came and went, and there was no meat famine—there wasn't even a shortage, in spite of the fact that the packing industry was plagued by a strike. That was just one more example of the way industry is geared to meet the nation's needs, and to deal with developments as they occur.

For 1948 as a whole, Federally-inspected meat production will be under 1947. But it will be about 15 percent above the prewar average. Production is not and cannot be constant from month to month. During the third quarter, for instance, there is always a decrease, for seasonal reasons. The packers handle that by storing meat to release during periods when receipts are light. It's like the old story about strawberry jam: The jam is made in the spring when the crop comes into bearing. But people eat the jam all the year round.

Going farther, at the present time it looks as if there will be a decrease in well-finished cattle from the corn belt states. But cattle of other grades, such as Commercial, will be available in adequate supply. On top of that, a step-up in hog marketings recently occurred and has helped to improve the meat situation as a whole.

Meat is a complicated business, and some of the fears of famine are based on a lack of understanding of how it works. But talk of serious shortages just doesn't make sense. According to the industry's experts, your butcher will continue to have plenty to offer.

PAYING FOR A STRIKE

The house organ of a Tennessee Coal Company recently ran this little piece under the heading, "Stray Thoughts: 'The coal industry has just had a long, costly strike. The employees of our mines have lost several hundred thousand dollars. Our country will suffer in many directions from shortages and higher prices. We have, due to the strike, given our customers terrible service. We have earned distrust of us and our product as a fuel.'

"Strange as it may sound . . . we do not know and never have known the reason for the strike. The operators paid the money and had no further authority. Nothing was gained except to show the enormous power of John L. Lewis."

There, in words that anyone can understand, is the plain, unvarnished truth. The fact that the coal industry is over for the time being must not be allowed to obscure the real issue that it raised. That issue is this: One man has a dictator's power over the economic life of the nation—over its defense program, its vital foreign aid policy, the welfare and prosperity of its people, the jobs of its workers, and the prestige of its government. That is not an exaggeration. Coal is the cornerstone of our economic system. Let its production be long enough prevented, and the whole machine must come to a stop.

The welfare of organized labor itself depends on ending this power. And if labor will not do that—if it continues to accept and applaud the excesses of its leaders—the people must act through their government. Senator Ball has suggested that industry be shut down overnight at the whim of a labor czar, be outlawed. That may be the only solution.

From where I sit . . . by Joe Marsh

Nicest Compliment I've Had

One of the nicest comments I've received about this column is from an editor in the Middle West. But that when I spoke of it to him, he called me a "moderate" because I gave myself a point. I think it illustrates a point.

"Joe," he said, "it is to happen I don't agree with everything you say, but I always like to run your thing. Because it gets down to earth and talks about the right kind of things. And it is only easy for tolerance towards the other person's point of view."

He went on to explain, by way

of illustration, that he never had happened to have a taste for ale from an editor in the Middle West. But that when I spoke of it to him, he called me a "moderate" because I gave myself a point. I think it illustrates a point.

"Joe," he said, "it is to happen I don't agree with everything you say, but I always like to run your thing. Because it gets down to earth and talks about the right kind of things. And it is only easy for tolerance towards the other person's point of view."

He went on to explain, by way

IN 1947, 83 per cent of the record total of 2,874,71 cords of pulpwood used by International Paper Company's Southern Kraft Division traveled by rail to the mills by railroad. Company conservation engineers inspect pulpwood arriving at the mills to be sure good cutting practices have been followed.

Telephone Workers Hold Mass Meeting

A mass meeting of telephone workers in West Palm Beach was held at 8:00 p. m., at 424 E. St. West, Palm Beach last night, says J. H. Stille, Chairman of Local 112, Division 49, Communications Workers of America with headquarters in Atlanta, Ga. The purpose of the meeting, was "to report to the telephone workers and their families on the wage negotiations now in progress between Communications Workers of America and the Southern Bell Telephone and Telegraph Company."

A full discussion was held of the strained relations now existing between the Bell System and its employees as a result of the recent discussion of wages. "The telephone employees have been harassed for many years by the willingness of the world's governments to utilize their vast economic strength and political influence to depress the living standards of its workers," said Mr. Stille. The meeting was called "to seek ways and means of attracting the attention of the public to the unfair treatment telephone workers are receiving without submitting the citizens of this community to the inconvenience of a strike."

"The Bell System operates a monopoly in this city and controls 90% of the telephone communications in the United States. C. W. A. represents about 220,000 of the Bell System employees, including those in Belle Glade who number about 40. We do not believe that the permission of the public to operate a monopoly for private profit was intended to grant also permission to ride roughshod over the rights and needs of the workers, who as a result of this monopoly cannot find equivalent employment with another employer," Stille said.

Draft Law Protects Job Status During Three Year Enlistment

"Jobs of men without prior service who enlist in the Armed Forces for not more than three years are fully protected," Colonel R. G. Howie, Commanding Officer of the Florida Military District announced recently.

"It is the belief of many organizations that the job status of men who volunteer is lost to reinstatement," the Colonel said. "This is erroneous, as the Selective Service Act of 1948 states that any person who voluntarily completes his period of training and who is discharged after a physical examination in good health, shall be restored by his employer with like seniority, status, and pay within 90 days after reapplication. The same protection also applies to officer and enlisted men reservists," the Colonel stated.

"An increase in volunteer enlistments is expected," Colonel Howie declared, "when more employees are aware of the job protection section of the Selective Service Act."

Huge Income Taxes To Federal Coffers

Federal income taxes paid by individuals in Florida during the fiscal year ending June 30, 1948 totaled \$241,075,469, almost exactly equal to the 1940 value of all goods manufactured in the State, the research and industrial division of the Florida State Chamber of Commerce stated yesterday in its weekly business review.

"This fiscal year total was made up of \$145,954,173 reported and paid on individual incomes and \$95,121,296 withheld from salaries and wages. The first category was 1.8 per cent below such payments during the previous fiscal year and the latter category was 12.2 per cent above the amount withheld the former year."

"Corporations in Florida paid

a total of \$67,857,359 in federal income taxes during the fiscal year 1947-1948, an amount 35.4 per cent greater than the total paid in the 1946-1947 fiscal year. In addition to income taxes, corporations paid \$2,299,873 in regular excess profits taxes in the past fiscal year, 5 per cent above the 1946-1947 total. A further federal tax paid by corporations was the capital stock tax. During 1946-1947 payments by Florida corporations under this tax amounted to \$24,201,941. This tax was repealed early in the fiscal year 1947-1948 therefore only \$139,242 was paid under it in that year. The totals of these amounts were \$4,285,002 for 1946-1947 and \$70,296,504 for 1947-1948 but these two totals are not comparable because of the change in coverage of the law.

"Other types of internal revenue collected in Florida during the past fiscal year were \$61,949,535 in miscellaneous internal revenue and \$20,034,228 in employment taxes (including carriers' taxes), up 2.3 per cent and 13.6 per cent respectively. "The final total of all internal revenue paid in Florida during the year 1947-1948 was \$383,355,704, down 4.9 per cent from the previous year."

Big Improvements Made On Indian River Ranges

Bill Williams, prominent cattleman in the Indian River section of Martin county, is making big improvements on his ranch land. He has ditched and diked 13,000 acres of land and installed two pasture lands installed two mammoth pumps. He has sprigged in 300 acres of Panicum Repens grass, and is preparing 1000 acres for Bahia grass. He also has planted 10 acres of improved Louisiana Coppernick sweet potatoes, and 40 acres of alfalfa.

Merle Williams, formerly of Pahokee, is also making extensive improvements on his ranch land which lie in the same geographical location with that of Bill Williams.

News About Florida Newspaper Improvements

The Ft. Pierce News-Tribune is adding a new addition to its plant at Atlantic avenue which will give it an additional 4,000 square feet of space for plant occupancy.

John W. Monahan, who has owned and edited the Sunter County Times at Bushell for the past ten years, has sold same to Gibson Frater, who holds from Indiana. Monahan, besides his law practice, will serve in the next legislature, and has other important investment interests, and it is his intent to devote his full time to these interests.

Hon. Tynne Cobb, who operates a large printing and binding

plant in Orlando, is erecting a new building and purchasing plant machinery, which will represent a \$35,000 capital outlay.

Farm and county foresters of the Florida Forest Service helped 738 small woodland owners gross \$494,132 in the year ending June 30, Management Chief R. U. Titus of the state agency said today.

Free assistance by the state agency, offered in cooperation with the U. S. Forest Service, consisted of marking timber for selective cutting and recommendations on turpentine operations.

Products harvested included 17,228,000 board feet of saw logs, 15,729 cords of pulpwood, 8,479 poles and pilings, 9,191 cross ties, and 3,294 barrels of crude gum.

Marking timber for selective cutting on 46,713 acres, the state foresters marked 17,691,000 board feet and 17,691 cords of timber for cutting.

Boytan Market Dissolves

The Boynton Farm Market Corporation has dissolved its corporate rights, and its members will unite with the new Co-Operative formed there. The Co-Op will serve the farmers of the east coast this coming season.

Difference Of Opinion On Proposed Amendment

First of the proposed constitutional amendments now being advertised for the November 2 election is House Joint Resolution No. 1269, proposing an amendment to Article IX, to be known as Section 17. The effect of this amendment if adopted is to write five cents of the state gasoline tax into the constitution and fix the distribution of their proceeds so that four cents will be spent by the State road department as it now is, and one cent will be distributed to the counties on the basis of the Second Gas Tax, to be used for the retirement of road and bridge bonds in each county proportionately to the amount until a surplus develops, there until 80 per cent of the surplus from this one cent credited to a particular county to be spent on state roads within that county as the county commissioners may direct.

The remainder is to be spent by the state road department on general highway construction and maintenance. Road users argue that the state has funds

Property Assessment Value

Hunnicut Associates, of St. Petersburg, who have been busy the past few months making a revaluation of realty and other taxable property in Clewiston, have completed their work. The City Commission acting as an equalizing board received comparatively few complaints on the realty valuations, but on personal property assessment there were quite a number of complaints.

The tax roll as determined by the commissioners has a valuations on realty of \$4,421,000 and on personal property, valuations of \$700,000, less \$1,339,000 on homestead exemptions, and \$10,000 on other untaxable property.

After much opposition the Commission will not assess the personal property on a 20

MUCH MONEY and precious time saved marriage candidates by the marriage bureau near the bank, Belle Glade, Florida. Estimated 6,000,000 surplus women caused by the late war. Men have caused ten years of war to every peace in this half crazy world and now talk of another war. This is leap year kids. 8-13-47

FOR RENT—Unfurnished apartment, reasonable rental. Inquire at W. C. Young, 2021 E. Okech station, office, or phone 811. 8-13-47

FOR RENT—77 acres, good for "Turkey Island" land, for pasture or farming. See Ray Wince, Chosen, Fla. 8-13-47

FOR SALE—Jay Bee Hammock mill. Excellent condition. Write Box 97. 8-27-47

FOR SALE—22 Caterpillar tractor at a bargain. Phone 167. 9-18-47

Save a Child—Save the Future

"SUFFER LITTLE CHILDREN"—Thanks to gifts from America, these Italian orphans were rescued from starvation in time. You can share in helping restore the health and save the lives of millions of other youngsters by contributing to the Crusade for Children of American Overseas Aid-United Nations Appeal for Children. State Treasurer, W. H. Barnett, Barnett National Bank, Jacksonville, Florida.

JUPITER SECTION
(Continued From Page 1)
Lokahatchee river, and over onto Jupiter Island up to Hobe Sound and it was astonishing to see the building development along these streams, and especially the palatial estates and mansions on the island. Stanley Peeler of West Palm Beach, a most wonderful and beautiful ranch layout on the river, and Errol Roebuck has a farm not far away from Peeler.

The Jupiter public school building, where Mrs. Robertson now teaches, is a beautiful architectural building and large enough to house many more times the 100 children now enrolled there.

Scattered all around Jupiter are to be found fertile farms, the product from which are shipped to florists all over the nation. Other plant nurseries and green houses, other large chicken ranches, and still other farm vegetables and raise cattle.

Altogether the Jupiter is in a prosperous sector, with great and the Lokahatchee river providing excellent salt water fishing.

Naval Reserve Radio Kept Area Informing On Storms Progress
Commander Jack Johnston and his crew of naval reservists are an important part of the community, and for a major part of the time the only reliable information about the storms progress.

By intercepting reports from the hurricane forces to the central office at Cleveland these boys were informed hourly with data on wind velocities and directions, as well as barometer readings from Okeechobee, Lucie, Canal Point, Belle Glade, Lake Harbor, Clewiston, Moore Haven and Okeechobee.

This information, coupled with the same information from east and west coast cities enabled the Navy boys to plot the storm.

The plottings would have been valuable data for the Miami Weather Bureau and would probably have prevented that outfit from giving out no information and misinformation.

This set-up is a "must" for the Disaster Committee from now on, and improvements will be made in the equipment and operation in the future.

The community owes these boys a vote of thanks for a job well done.

Phahokee Citizen Dies
James V. Hammond, aged 53, died at the Palm Beach Hospital Saturday, and funeral services were held at the Catholic church there. Burial was made at the Port Mayaca Cemetery. The deceased is survived by his wife and two daughters, Lillian and Lannette.

Raulph McMillen and Saw Have Serious Mixup
Raulph McMillen, employee at the Glades Appliance Corporation, was injured in a street, on Tuesday night, met with a painful accident. McMillen picked up a saw, and as he did he got a short circuit electric shock.

In attempting to drop the saw, he pulled the turn-on trigger which set the saw rotating. The saw struck his right leg just above the knee and inflicted a serious wound. He was given urgent attention at the Belle Glade Hospital.

Clewiston Has New Athletic Field
Good progress is being made on the construction of the fine new high school building at Clewiston, located just west of the city business section, and will be ready for occupancy after the Christmas holiday vacation. A fine new athletic field at school basketball court is being provided in the project.

Sellers Resigns From Pahokee Commission
Tony Sellers, of Pahokee, who is well known in the Glades as a railway agent for the Southern Railway, who has been serving as a member of the Pahokee city commission, has resigned from that position, owing to increased duties taken on for the railway company. The commission will name a successor.

Burned By Gas Explosion
Mrs. Mary Potter, who operates the lunch stand in the Sullivan Pharmacy, met with a bad accident when gas exploded when she attempted to light the stove. The flash severely burned her about the arms and face, so that she was taken to a physician's care for several days.

PETER PAUL SURPRISES CUSTOMERS WITH UNUSUAL SERVICE DURING BLOW

It was freely predicted on Monday and Tuesday night that our power would disappear when the wind became 20 miles per hour, but power was available until after daylight on Wednesday morning. The lines were cut to save trouble from the increasing winds hurrying towards us.

The hurricane being reported on by Miami Weather Bureau only damaged a few poles and everything was in readiness to cut us back in until the father-in-law of a second storm hit us. That went to work and disabled the lines between Pahokee and Belle Glade, as well as the two main transmission lines from north and south.

All night Wednesday night and all day Thursday until 11 p. m. local and imported crews labored to restore service to "must" locations.

The absence of power greatly disgusted the people, and hitherto seldom used were given mentally and verbally to Peter Paul, but he dashed them off and on to finally get things going. The gremlins were busy with his lines and we believe he needs a pat on the back.

The crew chiefs and their private parties deserve our thanks for working right thru the hurricane and afterwards to "get the lines hot".

NORTON TOSSSES
(Continued From Page 1)
to be some of the assembling and dispensing information about hurricanes and the fact he did not display any intelligence about until his 3:30 broadcast on Wednesday afternoon to the effect that "the end of this one is more severe than the head."

The local Disaster Committee, thru the Naval Reserves Radio Unit, was all the time aware of the twins entered the Florida Straits were more intelligently than the whereabouts than in Miami Weather Bureau if their public utterances are to be used as a mark of judgment.

If Mr. Norton was to compare his broadcast with our mapping of the "disturbance" path, let him bring 'em on.

The U. S. Weather Bureau presumably hires men of experience to head such an organization as the Miami Bureau, and the citizens have been led to expect expert information from these sources and with the people in its Army, Navy, Air Force, Coast Guard, Hydrographic Service, and other agencies.

Can any citizen in the Glades what he thinks of the service rendered to the Glades in reporting the "eleventh" twin-eyed monster" of Wednesday.

10 To 12 Inches Of Rain Fell In Glades During Hurricane
From 10 to 12 inches of rain fell in the U. S. Sugar Company's fields during the visits of the regular and illegitimate hurricanes we had on Wednesday, according to Mr. Harry Vaughan, Executive Vice-President.

Mr. Vaughan says most of the cane will be harvestable, although there is considerable damage to the cane.

It's possible that the commencement of our harvest will be delayed.

RED CROSS SURVEY INDICATES NO HELP NECESSARY IN GLADES
After a careful survey of damaged homes, it was found by Glades Red Cross workers that the damage in a great majority of cases is so slight that it will not be necessary to send special case workers to investigate.

Paper roofs were damaged, but very few individual case damaged shingles were hurt by the blows.

Trees and shrubbery suffered almost universally, but worst from the unrecognized second storm.

Commission Meeting Postponed
The regular session of the City Commission was postponed, owing to the regular session of the City Commission was not held, but will be held next Wednesday night at the usual hour. At that time the old council will close up its business and the new council body will take over on its own.

Reorganization will be made at that time, and tentative selection of departments made, no official releases have been made.

H. E. ROSE TO BUILD HOUSE
H. E. Rose, the contractor, has taken out a building permit for the erection of a new home at 542 SW Second street, which permits were issued to Rose, \$500; G. R. Townsend, \$100; G. G. Crosby, \$100; G. E. Williams, \$100; H. D. Beck, \$200 and G. G. Crosby, \$200.

Ralph Freeman To Be Presented With Life Membership To Legion

At the meeting of the local Legion Post, Tuesday night, a life membership to the Legion was presented to Legionnaire Ralph E. Freeman. Ralph, as most of us know him, has been a member of the legion for 30 years and during that time has done some real effective work in the organization.

All post around here were invited to attend the meeting. Department Commander Pat Reese of West Palm Beach and District Commander Max Curtis were present at the meeting.

Except for a matter of timing and luck, the story of these two men is exactly the same. A few minutes before the dead man was doing exactly the same thing as the happy-looking pedestrian. They both gambled their lives by walking on the right-hand side of the highway. One lost and the other did not lose yet. Police warn pedestrians to walk to the left of the highway. Police warn, At night, walkers should wear something white or carry a flashlight. Motorists' heads should be picked up dark clothing. Records show 152 pedestrians killed in 1945.

WILL ACCIDENT "PUT THE FINGER" ON YOU?

641 people, 195 of them pedestrians, killed in Florida by motor vehicles in a single year, the latest record shows.

The vacation season is the most dangerous time of year on Florida's highways. Out-of-State cars swell the volume of road traffic and make greater caution necessary.

Every day the "finger of accident" points out a car here—three cars there—to be added to the wrecks and mounting casualties of its victims.

What can you do about it—what will you do about it? The answer is simple. Drive carefully. Keep your car in safe repair. Watch out for other drivers and pedestrians. Obey traffic laws.

Make a habit of these few common sense rules and reduce your chances of auto accident to a minimum.

You can be a safe driver if you will. It's up to you.

OBSERVATIONS

(Continued from page 1)

meats for table use. That good old-corned beef, which was so noticeably absent for several years, is again back on the shelves, and is a leader in the canned meat list. Ounce for ounce, taste to taste, and use to use, the corned beef is the economical buy, especially for small families. While bearing American names as packers, most of the supply comes from South American countries. Canning prime beef there is cheaper as is the labor.

The National Parents-Teachers Association, which has its headquarters in Chicago, has a goal of six-million members for the present school year of 1948-49. Much of the success of many schools is due to the watchful and efficient work carried on by such associations.

Congratulations to the Belle Glade Farmer's Co-Operative Association in the obtaining of the former Boardwalk Packing House, as its coming operation home, one of the newest and best in the Glades. With its commodious floor space, excellent grading machines, and precooling plant, and good management, the Co-Op ought to be able to go forward to successful records, as it made in its first year of operation.

Over in Osceola County noted for its cattle ranges, records show that there are more than 500 cattle brands currently in use. Over in one of the large hardware stores in Kissimmee, there is quite a curious display of cattle brands that is well worth stopping to inspect.

A colored man of rather advanced age went into a bank to get a check cashed. He laboriously handed him, and he was so long counting the money the cashier at it, that the cashier asked him if it was all there. The negro replied, "Yes boss, just is."

A young city commission this week took command of city affairs, and being progressive business men, citizens can expect that affairs will be carried on in a business like manner.

Look around the bulletins at your post office and you will see that Uncle Sam has around 30 special commemorative stamps on sale, and new ones being added frequently, for from this source the old man gets quite an income for his exchequer. These stamps are always in big demand from the stamp collection people. We understand that there are quite a few people in Belle Glade who keep up stamp albums and exchange sales. I'm told that James Ball, Junius Harris and Sol Gordon and possibly many others get delight and pleasure out of their stamp collections. Foreign collectors are avid buyers of all special issues of the Postal Department.

The little old goober or peanut is quite a king, for now science has developed methods to use practically a 100 per cent of the plant and fruit. Here are some of the uses listed:

In oils, shortening, margarine, salad, cooking, deep fat frying, packing, medicinal, textile lubricants, cosmetics, soap and glycerine, food for livestock, feed for poultry, industrial artificial fiber, fertilizer, insulation material, stock feeds, paper board, plastics, live stock bedding, sweeping compounds, and explosives.

The sweet potato is nearly as prolific in use as the peanut and sugar cane is another plant which will produce sugar but many side products as well, and Carver, a colored scientist, is the man credited with these discoveries.

The starting of work on the survey of the new flood and water control project, seems a closer, as the result of financial steps developed during the past week. The area interests have reported to the Governor that certain requirements to get matching monies from the state would be met and that \$60,000 would be coming forth from the EDD section. The first step on the huge engineering project has already started with the work on the St. Leonards from Port Mayaca to Stuart, and levee work in Broward county.

The most noted gathering of religious and church workers of the world was recently held in the city of Amsterdam, Holland, which resulted in the legal setting up of the World Council of Churches, and the adoption of a constitution for its operation. Six Councilors to head work in the various portions of the world were elected, and the man selected for the Americas was Dr. G. Gromley Oakes, the first bishop of the New York area of the Methodist Church, a man deserving and able to carry out his assigned duties.

A good slogan which might be adaptable for use by our Chamber of Commerce, was one I saw placarded in the windows of the stores in St. Cloud. It read, "Boost St. Cloud, Build Buy in St. Cloud, then watch us Grow."

The manner in which town is growing, that prediction of the slogan has been proven.

In these days of advanced medicine and surgery, when the sick and maimed all demand the best of care and skill, seems that communities and areas, need and demand hospitals. For many years past the Glades area depended upon the small hospitals at Clewiston and Pahokee, until the Government built an excellently equipped the Migratory Hospital, along with what services were sought in the Palm Beach Hospitals.

With Belle Glade falling here through a generous Government gift, this city really secured an institution of real merit and equipment for its successful operation. The Sugarland Hospital at Clewiston was enlarged and new equipment installed which brought up the standard of that institution. The Pahokee Hospital was the last of the trio of hospitals, and it had not been given much room or equipment for the expansion of its work, nor did it appear much like an institution where the wounds and ills of humanity were ministered to by a skilled staff.

A spirit of dissatisfaction arose among the citizens of the Palm Beach County Hospital district, which grew to the point where sentiment and pooled books got to a unification, in a demand for a complete new hospital outfit, ending with a favorable bond issue vote calling for a \$160,000 expenditure over a period of 25 years.

Belle Glade has no jealousy over the good fortune of Pahokee, shouldered by its property owners, but congratulate our sister city that in time it will have a modern hospital plant of its own. What the future management of the two hospitals may be has not yet been determined, but at present are under the control of the Western Palm Beach County Hospital district.

Observation Gal 3

Latest reports just issued from national headquarters of the Rainbow Girl's is to the effect that the order now has a national membership of 130,000 in 1,600 chapters, in 42 states and seven other countries, and growing at a very rapid rate. This order was established in 1922 by Rev. Mark W. Sexton, of McAlester, Oklahoma, a 33rd degree Scottish Rite Mason. In Florida, the Eastern Star chapters are sponsoring the Rainbow Girls, the latest chapter being instituted at Dade City. Belle Glade in the number 1 chapter in Florida.

Back in my young manhood at Bristolville, Ohio, I became acquainted with a young man

where he can still cut hair but no shaving, the skill of the right hand having left his power.

The Judge and his wife sure did have a most pleasant and entertaining two day visit with these Ohio and Zephyrhills friends of past days, and our hosts seemed to enjoy our unexpected visit to them. Friendships of a lasting nature are valuable, and in this instance, it was a mutual one.

On my recent vacation swing, I visited in the home of Warren Chapin, a brother of the stage artist, at Coleman, and there met with an unexpected delight, in being able to view practically all the stage properties and costumes Chapin used in depicting the great Emancipator in his show, which for several years was the head line attraction on the well known Redpath Chautauqua circuits. There were his Lincoln and Uncle Sam outfits, the black mammoth furniture consisting of desks, tables, lamps, chairs and an old time Grandfather's clock. The trunks contained advertising matter, a scrap book with other stage souvenirs, relating to the great impersonating artist. It all seemed like a dream out of the past, and brought a flow of remembrances of the boy and man whom I had intimately known years ago.

All this equipment, which had been in storage in New York for 30 years had been sent by Miss Lucy Chapin, by truck, to the brother at Coleman, and fortunately he possesses a home, that can be fitted up for a display room for all his historical collection, which Florida people will soon be able to view.

Warren Chapin, the older brother, now appearing 80 years of age, cut his first head of hair as a barber at the age of nine years, he paying a boy companion 10 cents to let him experiment on his mop of hair. As a barber and a barber supply salesman in Ohio and Florida for three score and ten years, he did well, but has now retired, but still has a chair in his home

an enlarged moving, and with a season's transfer and Storage Company, 211 St. is fast becoming a fact. Many in the business are it renders. The company was added several modern transportation units. Not only is concern able to take care of local moving

New Spray Program Helps You Grow More QUALITY CELERY

Unbiased tests proved Dithane D-14 and "Neutrol Copper" best for celery disease control. That's the verdict of the Everglades Experiment Station, Belle Glade, Fla.

The Belle Glade station has tested a number of fungicides. On the basis of their actual field results, the station now recommends a program of alternate spraying—twice with Dithane D-14 and once with a "Neutrol Copper" on a 4 to 5 day schedule.

We have two Rohm and Haas products—Dithane D-14 and Yellow Cuprocid—ready to guard your celery crops.

See us for your Dithane D-14 and Yellow Cuprocid needs.

The Kilgore Seed Co.

Phones
Belle Glade 106 Pahokee 3201

SOUTH BAY BEACH CITY LAKE HARBOR

Mrs. Mildred Larriek and sister, Miss Helen Boerge recently returned from Tallahassee where they attended both terms of the summer session at the Florida State College. Mrs. Larriek is working for a degree, majoring in English. Miss Boerge has her degree with French as a major, and is leaving this week for Philadelphia, Pa., to enter the Episcopal School of Divinity for a two year course in Religious Education and a Master's Degree.

Mr. and Mrs. Burton Rawls of Belle Glade were the Sunday dinner guests of Mr. and Mrs. M. E. Cooper and family.

Mr. and Mrs. H. O. Mitchell returned from Hamilton, N. Y., the last of the week. They have been operating a store during the summer.

Mr. and Mrs. S. M. Bivens of Fort Lauderdale were the Sunday guests of Mr. and Mrs. J. C. Campbell and family.

Mrs. R. R. Roadman has returned home from a three week visit at Terra Haute, Indiana. She was accompanied on her trip by her father, James Alopp of Tampa.

Mrs. E. E. Hardy and infant daughter Cherry have returned from the hospital at West Palm Beach.

Mark Challenor, who has been engaged in the produce business at Hamilton, N. Y., during the summer returned home the first of the week with his truck and negro labor.

Richard Burney of Lake Worth was the Sunday guest of Donald Barnes.

Mr. and Mrs. H. C. Willis, who spent the summer in Seattle, Washington with their son-in-law and daughter, Mr. and Mrs. W. N. Christensen and son Curtis Neal, were visiting

at Harlem, Montana last week enroute home, expecting to reach the Glades this week.

There will be a Regional Conference of the Mormon Church at the Belle Glade Legion Hall on October 10, an all day session has been planned.

Mrs. Mildred Corley of Lake Harbor, mother of Mrs. Mildred Larriek and Miss Helen Boerge, is visiting her sister, Mrs. Anna Boatwright at Augusta, Ga.

Mrs. Mark Challenor and sons, Mickey and Jimmie have returned from a visit at Fort Pierce with Mr. and Mrs. J. Fred Bridges and family.

M. E. C. and Mrs. James W. Allen and little niece Jean of Pennsylvania were down from the Green Cove Springs Naval Base Sunday for a visit with his parents, Mr. and Mrs. W. C. Allen.

Mrs. W. M. Jeffries has returned from St. Mary's Hospital, convalescent from a recent major operation and is recuperating at the home of her daughter, Mrs. J. C. Campbell and family.

Mr. and Mrs. T. E. Weathers are leaving this week with their son Tommy for Atlanta, Ga., to consult an Allergy Specialist regarding an ailment of the child.

Mrs. Ada Littlefield of Daytona Beach, sister of the late C. M. Larriek, is visiting Mrs. Mildred Larriek at Lake Harbor.

Another Fatal Auto Accident Occurs Near Okeelanta

An accident on State Road No. 25 some 10 mile south of South Bay Friday night resulted in the death of Mrs. Carl Crawford of Miami and severe injuries to her husband, who was hospitalized at the Belle Glade Hospital. He was released from the hospital on Monday to relatives from Okeechobee, who came for him.

The sedan driven by the Crawfords crashed into a parked semitrailer truck. The truck driver, Harold Selma, was exonerated from any blame for the accident by Coroner George Tedder as highway patrolmen, Walton Sheffield and William Kaufman, who investigated the accident, reported that safety regulations had been observed by the driver of the truck. He had stopped for water, drawn to the side of the pavement and was putting out flares at the time of the crash, one flare being in place and the other being set.

The body of Mrs. Edna Mae Crawford was sent Sunday to the home of her parents, Mr. and Mrs. George W. Clay at Okeechobee.

Services and burial will be at Huntington, W. Va. She was 39 years of age. Survivors are her husband Carl Crawford, her parents, one sister Mrs. Mary B. Atkins, Okeechobee; six brothers, George W. Clay, Jr., Chicago; Claude Clay, Earl Clay, Albert Clay all of Okeechobee; Thomas Clay, West Virginia and James Clay.

At the inquest held before Justice George Tedder, Monday night, at Belle Glade, Monday night, a six man jury, acquitted Selma of any responsibility for the accident, for when he stopped his truck on the side of the road, he had complied with all highway regulations. Crawford, the husband of the dead woman, was unable to be in attendance at the inquest, but did give State Patrolman Sheffield a statement, which was presented to the court and jury.

This information was that the Crawfords were on their way home to Miami, and he had become tired, he suggested they pull off the road and rest, but that his wife did not favor the idea, so she took the wheel, although not an experienced driver, and that they were trying to regulate the gas, when the collision occurred, and he did not believe that his wife saw the parked truck.

A negro farm hand who was an eye witness to the accident, stated that he saw Selma place out his flares, and to his opinion the Crawford car was traveling in excess of 60 miles an hour.

County prosecutor Errol Roebuck was out to conduct the hearing and examined John Kirk, Ray Whitlock, Patrolmen Sheffield and Kaufman and several other witnesses.

Death Comes To A South Bay Flyer In South Pacific Crash

Clarence A. Cooper well known poultryman of Okeelanta, has received word of the death of his son 1st Lieutenant Winfield Warren Cooper, when his plane crashed on a flight from the island of Formosa to Clark Field, Philippine Islands, on September 8. An intensive 6 day hunt for the missing plane resulted in discovery of the wreckage and recovery of the body of Lieutenant Cooper according to advices received by his father. Lieutenant Cooper was 29

years of age this month. His present enlistment in the Army Air Corps was to have expired on September 29 and plans for himself and family to visit in South Florida had been made.

He is survived by his father, C. A. Cooper, his wife, Mrs. Naomi Cooper, two sons, Winfield Warren Jr., age 4, and David Bruce age 3, his mother, Mrs. Mary Moore of Canton, Ohio, two brothers, C. E. Cooper of Miami and Bobbie of Okeelanta, his grandparents, Mr. and Mrs. E. J. Cooper, pioneers at Okeelanta.

Lieut. Cooper was born at Canton, Ohio, coming to the Glades with his parents when a small boy. He attended school at Okeelanta, 1926-27 and at South Bay 1927-28. He was graduated from the High School at Williamston, W. Va., with honors and from the Concord College at Athens, W. Va., in 1930, majoring in physical education, planning to become an athletic coach.

He registered for the draft in 1939, enlisting in the Air Corps in 1940. He was given the privilege of completing his college course and called to active service immediately after graduation. He was selected as one of 50 students out of 3000 enlistees to be trained for a flight instructor at the Air Corps. Serving as instructor at Maxwell Field and Gunter Field near Montgomery, Ala. throughout the war, he graduated 172 student pilots.

Mustered out of the service at the end of hostilities, he taught for a short time at Brooks College, leaving there to re-enlist for a period of three years. He was stationed at Clark Field, Manila, P. I., and had his family with him. Mrs. Cooper is prostrated at his death and is in a coma. She is being flown from Manila to Lethem General Hospital at San Francisco under military escort. The two sons are being flown under escort direct to Canton, Ohio to await their mother's recovery. Plans for services and interment of the body await directions from his wife.

Lieut. Cooper was a flight instructor at Clark Field and details of the fatal flight are not known here, nor the cause of the crash, other than that he was killed instantly in the crash and that there were no signs of fire in the wreckage.

The sympathy of the community goes out to this poor family in their bereavement.

Pahokee Spooner Families Gather In Reunion Event
For more than a quarter of a century the Spooner family has had quite a record in Pahokee city, school athletic and church affairs. Dr. D. S. Spooner was the first of the family to locate in the lake shore community. For many years he was the only practicing physician and surgeon in the vast Glades area, where he is still active in his profession. Six family members of the connection later came to Pa-

LEGAL NOTICES

hokee, and have been good citizens.

For years in football, baseball and even in the boxing arena if a Spooner one or more, was not included, it was a miracle, as "Hub", "Snooks", Larkin

tion" were spoken by Calvin and Stewart were all leading athletes and the younger generation and J. C.

Mrs. J. C. Tabb, of the Pahoee Hotel, on Sunday entertained the family at a reunion dinner, the group consisting of Mrs. Sallie Davis, J. W. Spooner, Mrs. J. C. Tabb, T. S. S. J. B., and J. E. Spooner, while J. C. Spooner of Plant City, was unable to make the trip.

More Fishing Crews Added To Lake Survey

The State Game and Fresh Water Fishing Commission, which is now taking a fish census on Lake Okeechobee, had added two more crews on the survey, one from Havana and one out of Okeechobee.

Commercial fishermen are urging that the number of crews be largely increased, so that the survey can be hastened, and a report made on the investigation. They claim more crews will not cost any more than the few crews on a longer basis, and at the same time will aid the fishermen in getting catch fish for market sales.

DIE-DEAD KILLS MORE INSECTS FASTER OR YOUR MONEY BACK!

NON-TOXIC • NO ODOR • CAN'T STAIN
You can spray it around dishes, food or on clothes... in cupboards, refrigerators, on walls, floors, etc.
